DECLARATION OF RUTH
BOUTIN KUNCEL, Ph.D, IN
SUPPORT OF PLAINTIFF'S
RESPONSE TO DEFENDANTS'
MOTION FOR FED.R.CIV.P.35
EXAMINATION
NOTICE DATE:
Friday, November 30, 2012

Pursuant to 28 U.S.C. § 1746, Ruth Boutin Kuncel, Ph.D., declares under penalty of perjury under the laws of the State of Washington and the United States of America that the following is true and accurate:

1. My name is Ruth Boutin Kuncel, Ph.D. I am a licensed clinical psychologist in the State of Illinois. Prior to receiving a Certificate of Postdoctoral Respecialization in Clinical Psychology in 1992, I received my B.A., M.A. and Ph.D. in psychology from the University of

1 Chicago. I have conducted research and have extensive experience in the area of psychological
 2 testing and assessment. A true and correct copy of my curriculum vitae is attached as Exhibit
 3 A.

4 2. Based on my training, education and experience, I am qualified to testify to the
 5 matters stated herein, and do so within a reasonable degree of psychological certainty.

6 3. I was asked by Kathleen T. Zellner & Associates, P.C., to offer an opinion as to the
 7 value of additional psychological testing proposed by the defense, including the administration
 8 of an MMPI. I am of the opinion that it would be unproductive and likely counterproductive to
 9 conduct additional psychological testing on Dr. Spencer for the reasons stated herein.

10 4. Dr. Spencer is himself a clinical psychologist who is familiar with psychological
 11 tests, the assumptions underlying such tests, the structure of the subtest, the construction of the
 12 test items, how tests can be faked, and more generally test reliability and validity.

13 5. Research shows that when an individual has prior knowledge of the tests he is taking,
 14 the test results may be unreliable and invalid, akin to reviewing a class examination before it is
 15 administered.

16 6. To my knowledge there are no standardized norms that are specifically designed and
 17 directed to test a clinical psychologist.

18 7. Furthermore, Dr. Spencer has already been tested many times. Test/re-test results
 19 may be problematic because the test taker has gained familiarity with the test. Norms for
 20 properly interpreting test/re-test results of individuals who have been tested in excess of two
 21 times are limited and, depending on the test, non-existent.

1 8. In all, as described above, re-testing a clinical psychologist offers multiple
2 psychometric problems.

3 9. Additionally, earlier test results on Dr. Spencer are available. Dr. Spencer has
4 already been tested multiple times. These tests were generally administered before Dr. Spencer
5 became a clinical psychologist, and have fewer problems associated with testing and re-testing.

6 10. Given the state of psychological testing, there are too many confounds and
7 psychometric problems to make additional psychological testing psychometrically meaningful,
8 and in fact may lead to misleading results, as outlined above.

9 11. In summary, given the problems of Dr. Spencer's current circumstance as a clinical
10 psychologist who has been tested and re-tested, and the psychometric problems associated with
11 reliability and validity of the test results and interpretations, in my opinion further testing as
12 outlined above would not shed additional light on Dr. Spencer's claim of emotional and
13 psychological damages.
